GUARANTEE

This equipment (except transistors) is guaranteed by G.E.M. Electronic Instruments for a period of ninety days against defects in material and workmanship. However, this guarantee is void should the manufacturer judge the defect to be caused by abuse, crashes or other misuse by the customer.

Repairs within the guarantee will be provided at no other cost to the customer except that for return postage and registration insurance.

The repairs should be sent direct to the factory, NOT to the dealer. Repairs are not priced for dealer discounts.
